

East Bay Hindu Temple — Website Redesign

Prepared by Symbio AI for review with Pandit Rakesh Bhargav Ji · पूर्वी खाड़ी हिन्दू मंदिर

See it live:

ravikus1457.github.io/Symbio-AI-clients/east-bay-hindu-temple/

A modern, mobile-first website that keeps a traditional, devotional feel — built around the colours the Pandit asked for, **red** & **gold**, and featuring the deities tastefully.

Modernize, keep a traditional feel	Clean modern layout dressed in tradition — a lit diya, mandala, lotus, and a Sanskrit blessing
Lead with red & gold	Deep temple maroon & gold throughout, warmed with saffron and cream
Feature the deities, not overdone	Six gold-arched deity niches — present and beautiful, never cluttered

A walk through the site

1. Welcome banner — name in English + Hindi, a blessing, a lamp, clear buttons
2. Welcome message — a non-profit home for all families
3. Our Deities — Ram, Shiv, Durga, Hanuman, Ganesh, Radha-Krishna
4. Darshan & Aarti timings
5. Poojas & Sevas — at temple and at home
6. Festivals — the year's celebrations with dates
7. Our Priest — Pandit ji, with call / book buttons
8. Support the Temple — a giving popup
9. Visit Us — address, phones, live map, directions

The deities & donations

Deities: genuine public-domain paintings (Raja Ravi Varma) — or swap in the temple's own murti photos anytime.

Donations: a popup with suggested amounts. **Venmo is live**; PayPal, Zelle & mail-a-check are ready to switch on.

Features that run themselves

- “Open now / Closed” from the real hours
- 📅 Today's hours highlighted automatically
- 🕯️ Live countdown to the next festival
- 📱 Built for phones first
- ॐ Hindi & Sanskrit alongside English
- 🔄 Hours & festivals edited in one simple place

Going live

The temple is on **Wix**. A complete **Wix Studio** kit is prepared so the temple keeps the modern look with full control — and we'll help connect the existing web address, eastbayhindutemple.com.

What we still need from the temple
